

CAREER PROFILE

Currently working as a Hybrid Application Developer with 6 years of experience in frontend development. I have worked on more than 10 projects end-to-end in past 6 years including both product and services. Actively looking for suitable opportunity where I can explore more cutting edge technologies and a better workplace there by being a part of success of the organization.

EXPERIENCES

Hybrid Application Developer (Ionic + Angular)

2018 - Present

Robosoft Technologies, Udupi

My current role in Robosoft is to lead the Front-end team. I have working on multiple projects and I'll be involved in all the projects there by motivating and guiding the UI team. My responsibilities as a Front-end lead are:

- Building the project from scratch, thereby designing the framework of the project in modular and most maintainable way.
- Documenting the framework with DFDs.
- Motivating the team and learning from the team.

Software Engineer (Angular)

2015 - 2018

Majesco Ltd, Navi Mumbai

My role in Majesco was to be a Front-end Developer where I could put my time and ideas in Building Majesco's own product and be a part of huge team providing software service in Insurance domain. My responsibilities here was:

- Planning and finishing the task which was assigned and being with the team during critical stages.
- Giving daily reports of front-end development to client.

PROJECTS

Below listed are some of the major projects which I have been a part of. There are many minor projects where I have worked too.

IFA Connect (Axis Mutual Fund) - Robosoft Technologies

This project is about creating a complete solution for Axis Mutual Fund house distributors to make/manage the investments made by their investors. Its a hybrid app (Android, iOS and web) developed using Ionic 3 and Angular 6.

Frameworks used

Ionic - Angular

Application link

Still in development phase

NYL (New York Life Insurance) - Majesco Ltd

This is project which I'm working on since I started my IT career until I was in Majesco. It's a Life and Annuity project wherein users will apply for self and family insurance. It has more than 40 TPAs for which we have separate portal/site. Initially the project was built on Backbone JS, now the process is been started to update the framework and to use Angular 4.

Frameworks used

- Backbone JS
- Java (Spring Framework)
- Hibernate
- Oracle SQL
- Drool tools

Application link (thera are mutiple website for individual TPAs, some are listed below.)
